(54) AEROSOL COMPOSITION**(57)Abstract:**

PROBLEM TO BE SOLVED: To obtain an aerosol composition capable of imparting good cool feeling and dry and comfortable feeling to users to an applying part and obtaining always constant stable spray characteristics during used period.

SOLUTION: This aerosol composition comprises a stock solution comprising 1.0-10 wt.% fatty acid ester and 0.1-2.0 wt.% silicone component and isobutane, and the propellant is contained in an amount of 40-65 pts.wt. based on 100 pts.wt. total amount of the stock solution and the propellant.

LEGAL STATUS[Date of request for examination] **26.12.2002**[Date of sending the examiner's decision of rejection] **02.11.2004**

CLAIMS

[Claim(s)]

[Claim 1] The aerosol constituent characterized by becoming an undiluted solution containing 1.0 - 10 % of the weight of fatty acid ester, and 0.1 - 2.0 % of the weight of silicone components from an isobutane, and containing the propellants of 40 - 65 weight section to a total of 100 weight sections with an undiluted solution.

[Claim 2] The aerosol constituent according to claim 1 with which an undiluted solution is characterized by 40 - 90 % of the weight of water, and containing 1 - 30 % of the weight of alcohol.

[Claim 3] The aerosol constituent according to claim 1 or 2 with which an undiluted solution is characterized by containing 0.1 - 2.0 % of the weight of powder.
